

Help **Stop Assisted Suicide**

*Say **No** on Question 2.*
Flawed Law, False Choice

Many reasons to oppose PAS. Key flaws of Question 2:

- Doctors agree that patients often outlive terminal diagnoses of 6 months.
- Patients requesting suicide are not required to consult a psychiatrist or a palliative care/hospice expert, or to notify family members, even though many terminally ill patients suffer from depression.
- No doctor is present when the patient takes the lethal prescription.
- We should be supporting improved hospice and palliative care statewide, not legalized suicide.
